

## Center for Skeletal Research

We are pleased to announce the Annual Center for Skeletal Research Summer Lecture Series. These lectures are designed to introduce summer students and new lab members to the fundamentals of skeletal biology, and techniques used to study skeletal disease. Please encourage your summer students, technicians and new postdocs to attend!

### **Center for Skeletal Research Summer Lecture Series**

*All lectures are held from 4-5pm*

Wednesday, June 19 Mary Boussein PhD. Osteoporosis and Space Flight Induced Bone Loss  
Thier 10 conference room, 50 Blossom Street, Endocrine Unit, Mass General Hospital

Wednesday, June 26 Paola Divieti Pajevic MD PhD. Bone cells and their functions  
W2 conference room, 2<sup>nd</sup> floor, CABR building, Boston University, 700 Albany Street

Friday, July 12 Henry Kronenberg MD. Regulation of Mineral Ion Homeostasis  
Thier 10 conference room, Endocrine Unit, Mass General Hospital

Thursday, July 18 Marc Wein MD PhD. Gene editing and cell signaling  
Thier 10 conference room, Endocrine Unit, Mass General Hospital

Wednesday, July 24 Marie Demay, M.D. Vitamin D  
Thier 10 conference room, Endocrine Unit, Mass General Hospital

Wednesday, July 31 April Craft, PhD. Harnessing the Power of iPSCs to Study and Repair  
Cartilage  
Thier 10 conference room, Endocrine Unit, Mass General Hospital
