

Center for Musculoskeletal Research Newsletter

MARCH 2024

EVENTS

CSR Journal Club

Wednesday, March 6, 2024 • 4:00 – 5:00 pm ET

*“Deconstruction of rheumatoid arthritis
synovium defines inflammatory subtypes.”*

Aparna Nathan, PhD

Lecturer on Biomedical Informatics at Harvard
Medical School

[Read journal article here](#)

CSR Meet the Editor

**Sponsored by the CSR Early Stage Investigators*

Thursday, March 7, 2024 • 4:00 – 5:00 pm ET

*“Don’t lose the forest for the trees, an
approach to constructive reviews”*

Deborah Veis, MD, PhD

Editor-in-Chief of JBMR® Plus

Deborah Veis, MD, PhD is Professor of Medicine and Pathology & Immunology at the Washington University Musculoskeletal Research Center, where she is Associate Director, and leads a laboratory studying pathological bone loss, particularly in the context of infection and tumor metastasis. Her clinical specialty is Anatomic Pathology, focused on metabolic bone disease and breast cancer. She directs the Washington University Musculoskeletal Histology and Morphometry Core, and coordinates seminars and educational offerings for trainees within the Center.

Her editorial experience includes 5 years on the Editorial Board of *JBMR* (2011-2015), 2 years as Associate Editor for *Calcified Tissue Research* (2013-2015) and 6 years as Associate Editor for *JBMR* (2015-2021), and she is now the 2nd Editor in Chief of *JBMR Plus*, since 2021. She has published more than 140 articles, garnering 15,000 citations.

She is an enthusiastic mentor for PhD and MD/PhD trainees and junior faculty, actively engaged in graduate programs in Molecular Cell Biology and Molecular Microbiology and Microbial Pathogenesis.

CSR Grant Writing Workshop III: “The K Application Review Process”

*Sponsored by the **CSR Early Stage Investigators Committee**
Wednesday, March 20, 2024 • 4:00 – 5:00 pm ET

Karen Miller, MD

Professor of Medicine, Harvard Medical School;
Laurie and Mason Tenaglia MGH Research Scholar;
Chief, Neuroendocrine Unit, MGH

Musculoskeletal Research Symposium

Monday, May 6, 2024 • 8:00 am – 5:00 pm ET

In person event: MGB Assembly Row, 440 Foley Street Somerville, MA 02145

REGISTER for the event [HERE](#).

Submit an abstract [HERE](#). DEADLINE for abstract submission: MARCH 11, 5PM

KEYNOTE SPEAKERS:

“Fibrous Dysplasia/McCune-Albright Syndrome: Interplay of osteoclast/osteoblast function”

Alison Boyce, MD

Chief, Metabolic Bone Disorders Unit
Lasker Clinical Research Scholar
National Institute of Dental and Craniofacial Research
National Institutes of Health

Alison Boyce, MD is a pediatric endocrinologist and Chief of the Metabolic Bone Disorders Unit in the National Institute of Dental and Craniofacial Research, National Institutes of Health. The goal of her work is to enhance health and well-being for children with skeletal disorders by developing novel tools and treatments informed by pathophysiologic studies. She leads investigations in fibrous dysplasia/McCune-Albright syndrome, a rare disease affecting the bone and endocrine systems, and has characterized many aspects of this disorder and its treatment. Dr Boyce is a faculty member in the NIH Endocrinology fellowship training program. She is a member of the Fibrous Dysplasia/McCune-Albright Syndrome International Consortium and serves as Chair of the Medical Advisory Committee to the FD/MAS Alliance.

AND

“Sympathetic tone and cellular senescence: Leveraging integrative physiology for new osteoporosis treatments”

Sundeep Khosla, M.D.

Dr. Francis Chucker and Nathan Landow Research Professor
Mayo Foundation Distinguished Investigator
Mayo Clinic College of Medicine and Science

Dr. Sundeep Khosla is the Dr. Francis Chucker and Nathan Landow Research Professor of Medicine and Physiology and a Mayo Foundation Distinguished Investigator. Dr. Khosla received his A.B. degree from Harvard College and his M.D. from Harvard Medical School. He was subsequently a resident in Internal Medicine and a fellow in Endocrinology at the Massachusetts General Hospital. In 1988 he moved to Mayo Clinic, where his research has focused on mechanisms of age-related bone loss and osteoporosis. Dr. Khosla has served as Director of the Center for Clinical and Translational Science and Dean for Clinical and Translational Science at Mayo Clinic. He has received numerous awards and honors for his work, including the Frederic C. Bartter Award for Clinical Investigation and the William F. Neuman Award for Outstanding Scientific Contributions from the ASBMR, the Outstanding Clinical Investigator Award and Plenary Lecture from the Endocrine Society, and election to the ASCI and AAP.

CSR Friday Research Seminar *with UCSF*

Friday, April 5, 2024 • 3:30-5:00 pm ET

Occurs every first or second Friday of the month. [Click here](#) for full schedule.

MGH SPEAKER

Talk Title TBD

Michelle Yau, PhD, MPH

Assistant Scientist II

Assistant Professor in Medicine, Harvard Medical School
and Beth Israel Deaconess Medical Center

&

UCSF SPEAKER

Talk Title TBD

Muriel Babey, MD

Resident, Department of Orthopaedic Surgery UCSF

NEWS

CSR Mentorship Program

sponsored by the **Early Stage Investigator Committee*

Are you interested in finding a mentor to guide you on your academic journey? Are you facing challenges in certain aspects of your training or career?

The CSR has mentorship resources and offers valuable one-on-one mentorship experiences.

How to get started: email us at CSRmail@partners.org to let us know what you need help with!

Why Mentorship Matters

- Gain personalized guidance.
- Expand your network.
- Resolve issues.

→ Elevate your academic and professional journey.

NEW: CSR Clinical Phenotyping Core Mini-grant RFA

Director: Ata Kiapour, PhD

Mini-grants of up to \$10,000 are available to support the acquisition of critical preliminary data for grant submission or the use of clinical phenotyping to support existing work for a manuscript submission. Funds must be used for services provided by the Clinical Phenotyping Core (CPC; <https://csr-mgh.org/cores/clinical-phenotyping-core-2/>). Awarded funds will cover essential efforts at the CPC including personnel support for conducting the analyses. **Please contact Dr. Ata Kiapour** (ata.kiapour@childrens.harvard.edu) to discuss opportunities and advantages to using CPC services to support your ongoing and future research programs.

[Click here](#) for application details.

NEW: CSR Directed Differentiation Core Mini-grant RFA

Director: April Craft, PhD

Mini-grants of up to \$10,000 are available to support the acquisition of critical preliminary data for grant submission. Funds must be used for services provided by the Directed Differentiation Core (DDC). Awarded funds will cover essential lot-tested cell culture reagents and consumables in the core, and other associated experimental costs. **Please contact Dr. April Craft** (april.craft@childrens.harvard.edu) to discuss opportunities and advantages to using DDC services to support your ongoing and future research programs.

[Click here](#) for application details.

General CSR Core Mini Grants

Center for Musculoskeletal Research Core mini-grants (up to \$2,000 direct costs only) will be awarded for the purpose of obtaining critical preliminary data for an upcoming grant submission. Funds must be used for CSR Core services.

[Click here](#) for application details. Email applications to CSRmail@partners.org

CSR Innovation Awards

Innovation awards are designed to promote the ability of Center investigators to visit outside laboratories to gain expertise in novel methodologies which can be integrated into one of the Resource Cores so our community can benefit from these new technologies. Funds (up to \$5000) are available to cover the costs of supplies and reagents required, as well as any necessary travel. Applications are accepted on a rolling basis. Discussion with the relevant Core director is highly encouraged prior to preparing an application.

OPEN POSITIONS

1 Open Position: **Research Scientist**

Dr. Andreia Ionescu lab at Northeastern University

Position: Research Scientist in the laboratory of Dr. Andreia Ionescu at Northeastern University. Research in Dr. Ionescu's laboratory focuses on cartilage and bone stem cell driven regeneration using mouse models. The successful candidate will support projects investigating the molecular mechanisms of osteoarthritis and epiphyseal cartilage regeneration, as well as helping with general daily laboratory upkeep tasks. The position involves a substantial amount of mouse work as well as mammalian cell culture, general biochemistry and molecular biology techniques, flow cytometry and RNAseq / ATACseq.

[CLICK HERE](#) for full job description

For additional information about the Ionescu lab, please visit: <https://ionesculab.sites.northeastern.edu/>

2 Open Positions: **Postdoctoral Research Fellow** and **Research Technician**

Dr. Jialiang Wang Lab at University of Texas Southwestern Medical Center

Lab Description: Wang laboratory will take an interdisciplinary approach that spans genetics, multi-omics, in vivo and in vitro models, to characterize how aberrant factors can lead to skeletal disease and bone cancer. Previous and ongoing work 1) investigates the molecular program that regulates osteocytogenesis and bridges the gap between osteocyte development and human skeletal disease, and 2) reveals the regulatory role of transcription factors in bone cancer and develops novel transcription factor-targeted therapies. There are many exciting projects to work on and these projects will provide the opportunity to receive close mentorship and learn cutting-edge technologies, such as CRISPR-Cas9 gene editing, single-cell RNA-seq, spatial transcriptome and multi-omics analysis. We are very open to new ideas and support the scientific and career development of lab members.

[CLICK HERE](#) for full job descriptions

To apply for a position at the Wang lab, please email: jialiang.wang@utsouthwestern.edu
